

## ACUPUNCTURE CONSENT FORM

**"Acupuncture"** means the stimulation of a certain point or points near the surface of the body by the insertion of special needles. The purpose of acupuncture is to prevent or modify the perception of pain and is thus a form of pain control.

In addition, through the normalization of physiological functions, it may also serve in the treatment of certain diseases or dysfunctions of the body.

The potential risks: slight pain or discomfort at the site of needle insertion, infection, bruises, weakness, fainting, nausea, and aggravation of problematic systems existing prior to acupuncture treatment.

The potential benefits: acupuncture may allow for the painless relief of one's symptoms without need for drugs, and improve balance of bodily energies leading to the prevention of illness, or the elimination of the presenting problem.

"With this knowledge, I voluntarily consent to the above procedures."
